

# ANCDS

Academy of Neurologic Communication  
Disorders and Sciences

## 2018 ANCDS Annual Scientific and Business Meeting Wednesday, November 14, 2018 | The Westin Boston Waterfront, Boston, MA

Our theme this year is Advances in Neurological Rehabilitation with a focus on neuroplasticity and the use of technology during recovery from aphasia and motor speech disorders.

The Education and Standards Committee has convened an expert group of clinician-scientists to present the most recent research findings and advances in clinical application that will appeal to clinicians and researchers alike. Our invited speakers will provide updates on neuroplasticity across the age range, neuroplasticity and rehabilitation in recovery from aphasia, and the use of technology and engineering principles to assess and treat motor speech disorders. The goal is to promote a rich dialogue regarding advances in neurological rehabilitation that may improve and maximize treatment outcomes in aphasia and motor speech disorders.

### Topics and Speakers

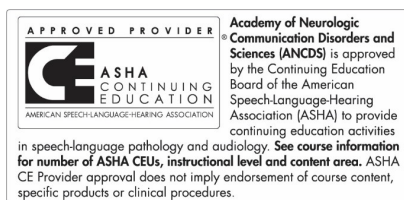

**Functional Reorganization of the Language System in Aphasia**  
Swathi Kiran, PhD, Boston University, Boston, MA

**Incorporating Learning into Aphasia Rehabilitation**  
Sofia Vallila-Rohter, PhD, MGH Institute of Health Professions, Boston, MA

**Voice and Speech in Parkinson's Disease: Motor Control, Physiology, and Acoustics**  
Cara Stepp, PhD, Boston University, Boston, MA

**Speech Analysis for Medical Diagnostics – From Senses to Sensors**  
Jordan Green, PhD, MGH Institute of Health Professions, Boston, MA
