

ANCDS Scientific and Business Meeting November 2012

In cooperation with the Georgia Speech-Language-Hearing Association, ANCDS proudly announces the 2012 Scientific and Business Meeting. The theme of this meeting is “Brain and language: Structural and behavioral evolution, evidence for treatment, and collaborative social responsibility”. The Education and Standards Committee gathered together six individuals who created an interesting and thought-provoking program. Our speakers this year represent several academic and clinical disciplines, including (in reverse alphabetical order) voice disorders, resource utilization, palliative care, head injury, aphasia, and anthropology. The Education and Standards Committee enthusiastically welcomes you to the Peach State and to Atlanta for the 2012 program.

Topics and Speakers

The evolution of brain language systems

James Rilling, Ph.D.
Department of Anthropology
Department of Psychiatry and Behavioral Sciences
Emory University
Atlanta GA
